Course Introduction & House Rule

Day 1 · Morning Session

Dawei Chen

18 April 2026

Morning's Roadmap

1

Welcome & introductions

Instructor and students

2

How this course was designed

Philosophy and evolution

3

What we will cover

Schedule, materials, learning outcomes

4

What is expected of you

Assessment and group project

5

House rules and AI use

Norms for working together

PART I

Ice Break

About Your Instructor

Dawei CHEN

Assistant Professor of Management, CBPM, WKU

Education

Postdoctoral Fellow in AI Governance — AI Singapore, NUS

Ph.D. in Information Systems — School of Computing, NUS

B.S. in Economics — School of Economics & Management, THU

Research

Information privacy; economics of generative AI

Outside the office

Fitness, hiking, marathon, scuba diving

Generated by ChatGPT Auto. Original photo taken in Longwan, Wenzhou, 15/03/2026

Generated by ChatGPT-5.2. Original photo taken in Tioman, Malaysia, 30/06/2025

Contact

Office: CBPM B214

Email: dchen@kean.edu

Office Hours

Tue & Thu 11:15 – 12:30

Wed 14:00 – 16:30

Your Turn — Introduce Yourself

Who you are

Name + MBA track (full-time / part-time)

What you've done

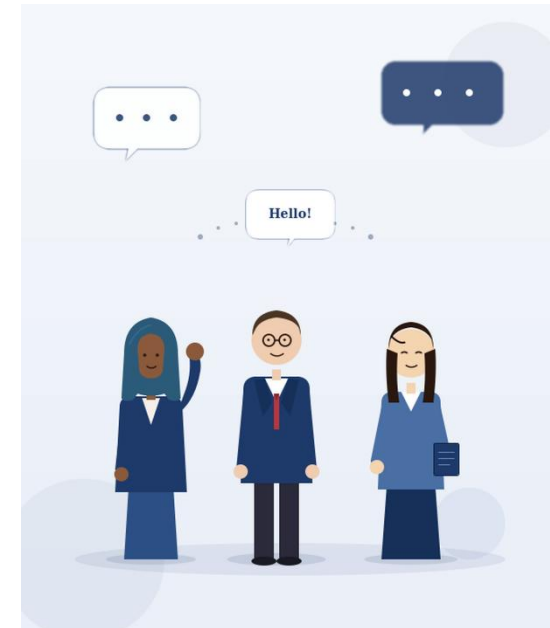

Academic background and current role / industry

Why you're here

What motivated you to join this MBA program

What defines you

One unique experience, strength, or hobby

Generated by Opus 4.7

PART II

How This Course Was Designed

An Iteratively Refined Course

Three cohorts of evolution before this section

Fall 2025 W03&W04

Initial Design

- First MBA-level offering
- AI integrated into the core group project
- Dedicated AI module introduced
- Positive student feedback overall

Spring 2026 W01

Major Revision

- Group-project requirements clarified
- AI module split: organizational use × individual fluency
- More space for students' own industry experience

Spring 2026 W02 (you)

Rigor Enhancement

- Deeper integration of game theory and strategic thinking
- Group project expectations sharpened with clearer requirements
- Refined pacing across the six days

Two Pillars of This Course

What I am trying to balance

Pillar One

Industry Relevance

The course should connect to real managerial decisions you face.

We will draw on:

- Cases from textbooks and current business press
- AI use cases relevant to organizations
- Your own experience — you will be asked to share

Pillar Two

Intellectual Challenge

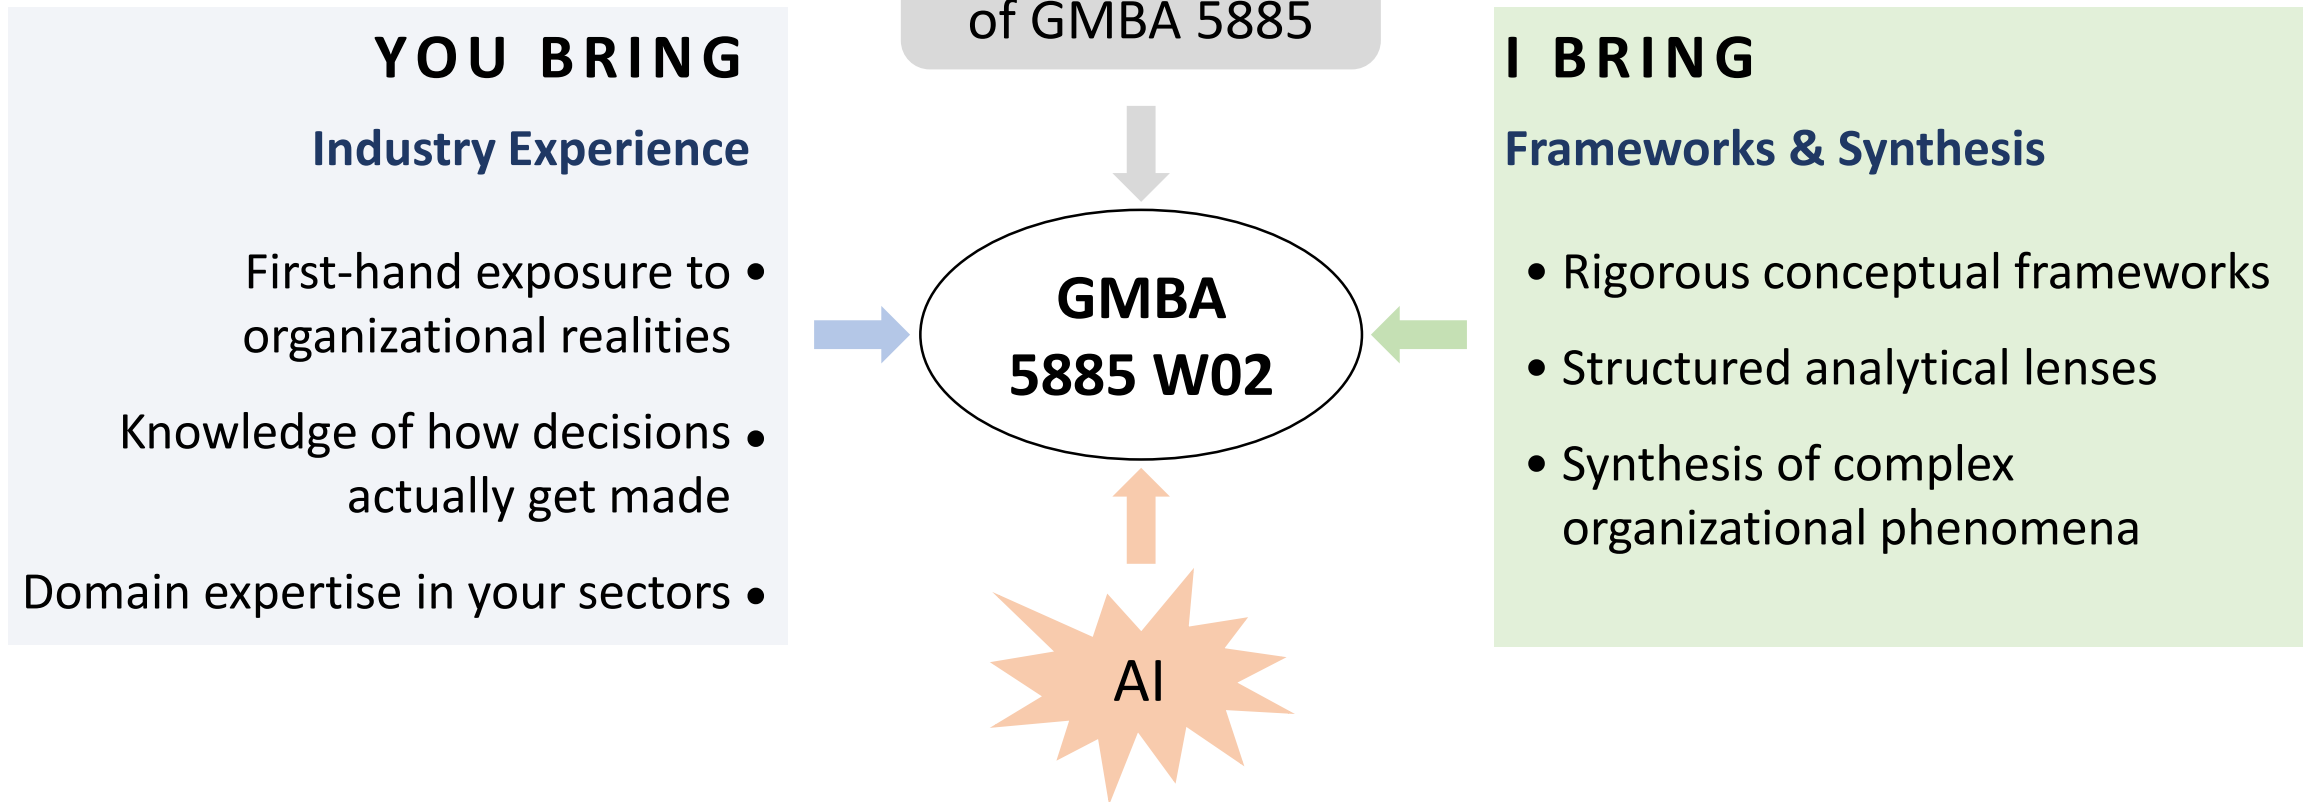

MBA education is not vocational training. It must be intellectually demanding.

We will work with:

- Strategic frameworks (Five Forces, Value Chain, RBV)
- IS-specific lenses (IS Strategy Triangle)
- Game theory and strategic-thinking models

Course Overview

An honest division of labor

Before I Tell You — Tell Me

Mentimeter check-in

Q1

Your view of MIS

What comes to mind when you hear “Management Information Systems”?

Q2

Your view of this course

Based on the title and syllabus, what do you expect we will focus on?

Q3

Your learning goals

What do you want to gain — skills, insights, outcomes?

PART III

What We Will Cover

Student Learning Outcomes

What you should be able to do by the end of this course

Course-Level (University-Defined)

- Describe the applications of technology in a global enterprise
- Analyze the strategic use of information resources
- Formulate policies to manage and govern the IS function
- Evaluate the security and privacy of information

Section-Level (I-Defined)

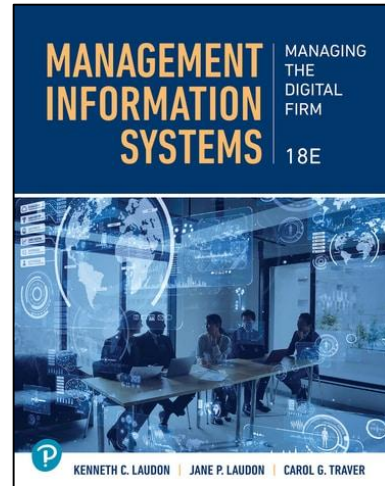

- Explain how AI creates business value and identify AI-enabled use cases in your own organizations
- Apply the 4D AI Fluency Framework — including prompt, context, and harness engineering, and design of skills and agents
- Apply game-theoretic reasoning and strategic-thinking frameworks to digital markets and IS-enabled ecosystems
- Integrate course frameworks with your own managerial experience to design AI-enabled strategic solutions

Course Materials

Suggested, not compulsory

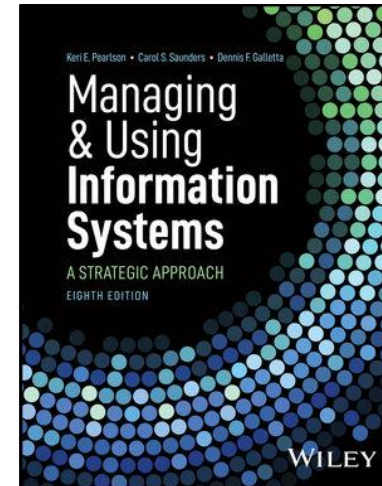

Foundational MIS Concepts

Management Information Systems, 18th Edition, by Laudon et al., Pearson 2025

Strategic Framework

Managing and Using Information Systems, 8th Edition, by Pearlson et al., Wiley 2024

- Case-analysis materials will be provided on Canvas.
- Earlier editions (e.g., Laudon 17th, Pearlson 7th) are often available online.

Course Schedule

Note: The schedule is tentative and may be adjusted based on class progress and discussion dynamics

Date	Topics	Activities
4-18	Course Introduction & House Rules Introduction to MIS	Icebreaker, course roadmap <i>Case: UPS</i>
4-19	IS Strategy Triangle Strategic Use of Information Resources	<i>Case: Judo Bank</i> <i>Case: TBD</i>
4-25	MIS and Digital Transformation Ethical and Social Issues in MIS	<i>Case: Tsingtao Brewery</i> Mini group presentation
CSMT 118	<i>Proposal due May 9 (Saturday), 23:59 (Beijing Time)</i>	
	AI in Organization: Business Value & Use Case AI Fluency for Individual	<i>Case: Baidu intelligent recruitment</i> 4D framework exercise
	Game Theory & Strategic Thinking TBD	Classroom game
5-17	Group Project Presentation Final Report Drafting	20-min pre + 5-min Q&A per group Lunch (pizza)
<i>Final report due May 23 (Sat), 23:59 (Beijing Time)</i>		

A Typical Day

Morning (09:00 – 12:00)

- 09:00 – 10:15 Lecture
- 10:15 – 10:30 Break
- 10:30 – 11:45 Lecture + Case Study

Lunch Break (11:45 – 13:00)

Afternoon (13:00 – 17:30)

- 13:00 – 14:15 Lecture
- 14:15 – 14:30 Break
- 14:30 – 15:45 Lecture + Case Study
- 15:45 – 17:30 Group Project Consultation

Too heavy/intensive ✖

Class ends at 4pm ?

Note: This schedule is a general guide and **may be adjusted** based on class progress, participation, and discussion flow.

PART IV

What Is Expected of You

Course Assessment

How your grade is composed

Component		Weight
Individual	Attendance	10%
	Participation	10%
Group	Case Analysis	20%
	Proposal	20%
	Presentation	20%
	Final Report	20%
Total		100%

Course Assessment

Attendance (10%)

- Email absence requests in advance to dchen@kean.edu
- **1 point** deducted per **half-day absence** — for any reason
- **More than 2 full days** (4 half-days) missed → **retake** the course

Participation (10%)

- More than showing up — prepare, contribute, collaborate
- Share real-world insights from your own experience
- Ask questions that link theory and practice
- Both frequency and quality of contributions count

Course Assessment

Case Analysis (20%)

Each unit includes one of the following:

an in-class group case study, a mini group presentation, game

Expectations

- Engage actively in group and class discussions
- Apply frameworks to real business situations
- Connect analysis to managerial decisions

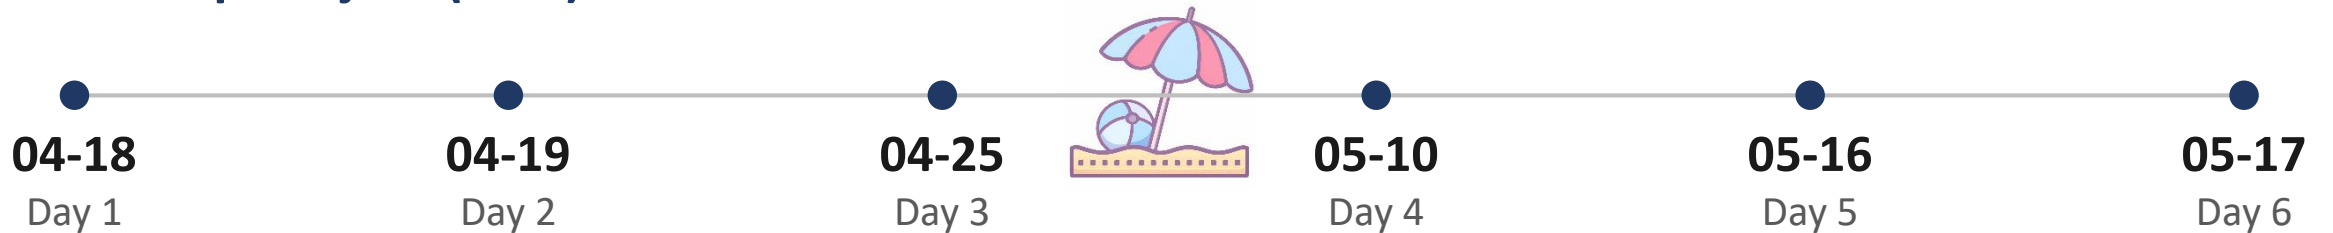

Grading

- **Quality** and **depth** of analysis
- Strength of contribution to group output
- *All members of a group receive the same grade unless exceptions are formally approved*

Course Assessment

All members of a group receive **the same grade** unless exceptions are formally approved.

Group Project (60%)

Stage 1

Proposal

Due May 9 (Sat)

6–8 pages · 20%

Stage 2

Presentation

May 17 (Sun) 9:00-12:00

20-min + 5-min Q&A · 20%

Stage 3

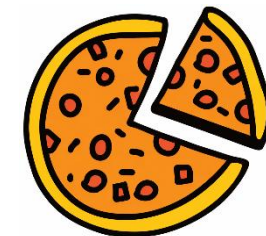

Final Report

Due May 23 (Sat)

~15 pages · 20%

New for W02 — Problem–Solution Logic

Two structured templates will guide your work: **Problem Articulation** and **AI**.
See full instructions on “*group project instructions w02.pdf*”.

PART V

House Rules: AI Use

AI Use Policy

Honest, transparent, and learning-focused

What matters most is **how** you use AI — not **whether** you use it.

Different modes of AI use — all acceptable in this course

Full agent

AI completes the task end-to-end

AI-generated + human edits

AI drafts; you revise

Human-written + AI polishing

You write; AI refines

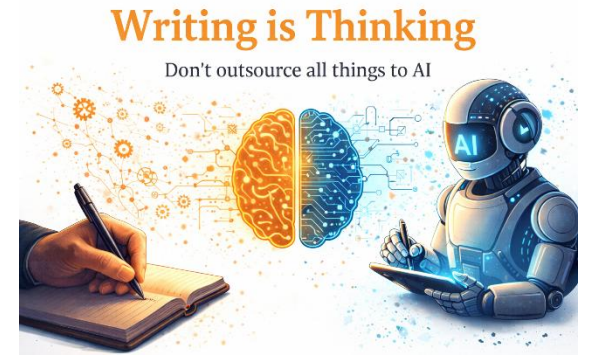

Human × AI co-creation

Iterative back-and-forth

- I will not detect, judge, or penalize AI use.
- Disclose AI use clearly in your submissions, as required by the assignment instructions.
- AI may not be used to fabricate data, invent citations, or generate statistics presented as factual evidence.

Use AI Smartly

Avoid the over-reliance trap

Generated by ChatGPT Auto

Risks Of Over-Reliance

- **Efficiency today vs. capability tomorrow**

AI use can erode independent reasoning skills ([Kosmyna et al., 2025](#)).

- **Judgment still matters**

Good taste — knowing what is right, what is missing, what is off — is more important than ever.

Best Practices

- Use AI as a complement, not a replacement
- Verify outputs — never trust blindly
- Be transparent — [cite and disclose AI use](#)
- Ask better questions — get better answers

Day 4 – AI Fluency for Individual

Q&A
