

温州肯恩大学

WENZHOU-KEAN UNIVERSITY

MGS 3001 WHS01
Python Programming for Business

Course Introduction & House Rule

Dawei Chen

Week 1-1, 26 Feb 2026

Icebreaker

Dawei CHEN

- **Education**
 - B.S. in Economics – SEM, THU
 - Ph.D. in Information Systems – SOC, NUS
 - Postdoc in AI Governance – AISG, NUS
- **Research:** Information Privacy, Economics of GenAI
- **Interests:** Fitness, Hiking, Marathon, Scuba Diving
- **Office:** CBPM B214
- **Email:** dchen@kean.edu
- **Office Hours:** Tue & Thu 11:15 – 12:30 | Wed 14:00 – 16:00

*Generated by ChatGPT-5.2. Original

30/06/2025*

Icebreaker

- **Basic Information**

- Name (preferred name)
- Major / Year
- Where are you from

- **Academic Background**

- Have you learned programming before? (If yes, which language?)
- Any experience with Python, Excel, data analysis, or AI tools?

- **Interests & Goals**

- Why are you taking this “honors” course?
- What skills do you hope to gain?
- How do you think Python may help your further career?

- **Fun Fact**

- A hobby, talent, or something unique about you

Course Overview

Introductory
Application
Inspiration

Learning Outcomes

Upon successful completion of this course, the student will be able to:

- A. Generate Python scripts to **extract, clean and prepare data**
 - B. Write code for processing data in **spreadsheets and CSV files**
 - C. Use Python modules for **parsing files** and grouping data
 - D. Analyze and summarize the data using **tabular and graphical display**
 - E. Recall and use standard library modules and built-in functions
-
- F. Use **AI tools** appropriately to support Python programming
 - G. Independently complete an **entry-level data analysis project**, including **data collection, cleaning, analysis, visualization, and presentation of insights**

Course Format

I. Lecture (Theory)

II. Lab (Practice)

Please bring your laptop!

Course Materials

- Abundant Online Materials
 - Thousands of free resources available
 - **Vary in style, depth, language, and format**
- Official Documentation
 - [Python 3.14.3 Documentation](#)
- Tutorial Platforms
 - [W3Schools](#), [菜鸟教程](#), Bilibili, YouTube, Coursera
- Practice & Community
 - [GitHub](#), [Kaggle](#)
- AI Coding Assistants
 - Copilot, Cursor, Gemini, ChatGPT, Claude, 千问, 豆包

No textbook required!

- *Starting Out with Python*, Tony Gaddis, Pearson
- *Automate the Boring Stuff with Python*, Al Sweigart, No Starch Press
- *Python for Excel*, Felix Zumstein, O'Reilly Media

Reading materials will be provided throughout the semester as needed.

Course Schedule (v1.0)

Before Midterm

- Syntax and language element
- Understand Python code

Date		Topics	Note
W1	2/26	Course Intro & House Rule	
W2	3/03	Intro to Python	What is programming? Why Python? First script, input, output
	3/05		
W3	3/10	Python Basics	How Python stores information?
	3/12		
W4	3/17	Data Structures in Python	Lists, tuples, sets, dictionaries
	3/19		
W5	3/24	Control Flow Statements	If/else, Boolean logic, for/while loops
	3/26		
W6	3/31	Functions and Modules	Function structure, parameters, return values <i>Assignment 1</i>
	4/02		
W7	4/07	File and Exception Handling	Work with files, try/except, debug
	4/09		
W8	4/14	Classes and Object-Oriented Programming	
	4/16		

The schedule is tentative and may be adjusted based on class progress.

Course Schedule (v1.0)

Before early alter

After Midterm

Use Python to independently complete an entry-level data analysis project, including data **collection**, **cleaning**, **analysis**, **visualization**, and **presentation**

Date		Topics	Note
W9	4/21	Review, Q&A for Midterm Exam	
	4/23	Midterm Exam	
W10	4/28	Python Web Scraping	Collect external data using API, requests library Assignment 2
	4/30		
W11	5/05	No Class	
	5/07	Data Cleaning	
W12	5/12	Data Analysis	Pandas library
	5/14		
W13	5/19	Data Visualization	Matplotlib and seaborn libraries
	5/21		
W14	5/26	Agentic Coding	Assignment 3
	5/28		
W15	6/02	Business Automation	Scheduling scripts, sending emails
	6/04	Individual Project Presentation	
W16	6/09		

The schedule is tentative and may be adjusted based on class progress.

Course Assessment

Grade Breakdown	
Participation	10%
Assignments	30%
Midterm Exam	30%
Individual Project	30%
Total	100%

Course Assessment

- **Participation (10%)**
 - Submit leave requests via email with supporting documentation
 - 1 point deducted for each unapproved absence
 - 3 consecutive unapproved absences will be reported to the University
- **Assignments (30%)**
 - 3 individual assignments (10% each)
 - Late submissions receive a 50% deduction
- **Midterm Exam (30%)**
 - Date: TBD (before early alter deadline)
 - Closed-book, computer-based exam

Course Assessment

- **Individual Project (30%)**

- Detailed guidelines will be released after the midterm exam
- An entry-level, end-to-end data analysis project using Python

Project Overview

- Identify and collect data from an external source (i.e., web scraping with Python)
- Clean and prepare the dataset using Python
- Conduct exploratory data analysis and visualization
- Present key findings and insights in a clear and structured format

Responsible AI Adoption

Shen, J.H. and Tamkin, A., 2026. [How AI impacts skill formation](#). *arXiv preprint arXiv:2601.20245*.

- All participants completed a warm-up coding task (no [Trio](#) knowledge required).
- During the main Trio task, the treatment group could use AI assistance for questions and code generation.
- During the comprehension check, AI use was not permitted for any participant.

Responsible AI Adoption

Shen, J.H. and Tamkin, A., 2026. [How AI impacts skill formation](#). *arXiv preprint arXiv:2601.20245*.

Responsible AI Adoption

Email from OVCAA

*“Upon consultation ... will be **disabling the AI Detection feature** in Turnitin within Canvas as of January 11, 2026 ... This decision is based on extensive research ... which indicate that **AI Detection tools are frequently inaccurate** ... negatively affect students’ agency, mental health, and rapport with instructors ...”*

Suggestions

- Avoid over-reliance on AI
- [AI as a complement, not a replacement](#)
- Master prompt engineering
- Verify AI output
- Ensure proper [citation and attribution](#)
